Mobile Fingerprint Readers

337.1 PURPOSE AND SCOPE
The purpose of this policy is to establish guidelines for the use of Portable Fingerprint Scanners (herein after referred to as scanners) to assist in the rapid identification of a person.

337.2 DEFINITIONS
Automated Fingerprint Identification System (AFIS) - a biometric identification (ID) system that uses digital imaging technology to obtain, store, and analyze fingerprint data.

Portable Fingerprint Scanner (scanner) - a handheld device that communicates with the Colorado Bureau of Investigation’s Automated Fingerprint Identification System (AFIS). The scanner checks two fingerprints obtained from the person of interest and can provide positive identification if the fingerprints exist in the RISC database.

Repository of Individuals of Special Concern (RISC) - A subset of the FBI's Criminal Master File with the ability to quickly assess subject threat level and positive identification if the person of interest has a record in the RISC system.

337.3 POLICY
Portable Fingerprint Scanners provide officers and authorized employees with a specialized tool to assist in the positive identification of individuals. Identifications searched through the AFIS system are limited to subject in the respective RISC databases. Scanners access AFIS and the National Crime Information Center (NCIC) and the Colorado Crime Information Center (CCIC) databases for identification purposes only. Officers will still need to query the person of interest through NCIC/CCIC and Department of Revenue (DOR) to determine the person's warrant, protection order or driving privilege status.

(a) No employee may use the scanner until after they have received the State-mandated training by the Colorado Bureau of Investigation.

(b) Officers will maintain the scanner in accordance with the manufacturer's recommendations.

337.4 AUTHORIZED USE

(a) Scanners may be used with the approval of the Coroner's office staff to identify a deceased individual.

(b) Officers may use scanners if reasonable suspicion exists to arrest the individual, although the scanner does not replace the traditional fingerprint process.

(c) Officers may also use scanners to identify at-risk or likely missing persons who are not able to identify themselves, to include unconscious, unresponsive and non-communicative subjects that do not possess identification.
Mobile Fingerprint Readers

(d) Officers will not take an individual's fingerprint on a consensual contact without the subject's consent. If at any time the subject withdraws the consent, the officer must stop the fingerprint process.

(e) The subject may withdraw consent at any time. If the consent is withdrawn, the use of the fingerprint device is NOT AUTHORIZED and its use must stop immediately. The officer may not force or coerce the subject to submit to the fingerprinting.

(f) If the subject is a juvenile, the parent or legal guardian is required to give consent before the fingerprint device may be used.

(g) The mobile fingerprint device may be used without the consent of the subject:
   1. Upon arrest of the subject;
   2. If authorized in the execution of a valid search warrant; or if specifically required by statute or pursuant to court order.
   3. If a subject is required by law, when an officer has reasonable suspicion, to provide identification and has refused to identify themselves and other reasonable means have been exhausted.
